FULLSTACK DEVELOPER [PHP LARAVEL & REACT JS]

PROVIDE THE ANSWERS TO THE QUESTIONS BELOW INCLUDING TO THE As & Bs PART OF THE QUESTIONS WITH LINKS TO THE PROJECTS, APPS, PLATFORMS.

—
NOTE, WE VALUE HONEST ANSWERS AND PROOF OF WORK

—
CANDIDATE NAME:
[Write your name here]

—
CANDIDATE PROFILE & URL:
Write here your LinkedIn and project portfolio website]

—
Please answer the following questions fully and honestly.

1.

Send us a description of your:

- [a] PHP Laravel and React JS projects
- [b] your actual code development contribution

2.

Describe [a] your most challenging PHP Laravel and React JS projects and [b] specify the programming languages that you used in building those challenging projects and in particular PHP Laravel and React JS

3.

Although we continue to use PHP Laravel and React JS, and require you to use these in our current setup ;

Nonetheless ,

3.1.

We are building sovereign blockchains using Cosmos SDK.
Are you willing to learn Cosmos and use Golang language?

3.2.

Separately,

We plan to build a powerful, resilient, high throughput, network-effects facilitator and integrated web-apps, PWAs, dApps enabling blockchain similar to BASE a Coinbase company . Our blockchain would achieve interoperability, faster settlement time and scalability while uniquely decreasing transaction costs to zero for end users.

Are you willing and able to build an avante-garde web-app, PWA, dApps using necessary compliant languages including Go, Javascript, Typescript, Shell, Ethers JS and web3.JS?

4.

Describe a currently live, active web-app, PWA, dApp or platform that's used daily by lots of people, which you singularly built, (coded all by yourself) or of which you were the lead developer or of which you were just one of the many developers involved, and if so, then describe in detail the actual development role which you played and the key programming task which you undertook.

5.

Provide any material code development information with links that you consider will help us to reasonably understand the technical contributions you can bring to us and our various blockchain and fintech projects

6.

We require you to develop many tens of web-apps, PWAs, dApps, possibly over two dozen between now and summer 2025

Confirm that you can lead such developments.

Also, list your track record for each below;

6.1.

DESCRIBE YOUR PROVEN PROLIFIC USE OF PHP LARAVEL LANGUAGE AND / OR REACT JS

6.2.

LIST YOUR DEVELOPED PROJECTS

6.3.

LIST THE BOTS THAT YOU BUILT

Provide clear and detailed answers, with public url links.

7.

We require you to develop a diverse and high number of web-apps, PWAs, dApps and to integrate these as standalone and as ecosystem that are integrated with numerous smart contracts and with their supporting infrastructures

7.1.

Confirm that you can develop a diverse and high number of web-apps, PWAs, dApps and are able to integrate these.

7.2.

List your track record for web-apps, PWAs, dApps development and their integrations.

7.3

PWA.

Specify your PWA experience backed with links to each that you built.

Thanks for providing honest answers and your proof of work

Regards.
